iii) Interpretation of terms used

“Public Land” has the meaning assigned by article 62 of the constitution and includes the coast foreshore, river, dams, lakes, and other reserves under the survey act or under any other law.

“Management body” has the meaning assigned by the land act and includes statutory body, public corporation or a public agency that is authorized by the commission to manage reserved land under section 16 of the Land Act 2012.

“Approving body” means the person or institution to who proposed plans must be submitted under the Physical and Land Use Planning Act, 2019 for authorization.

“Land use management plan” means a plan prepared by a public agency for the land they hold and submitted to the commission for approval.

“Practicing Registered Planner” means a person who is holding a certificate as a registered physical planner under section 7 of the Physical Planners Registration Act, 1996 (No. 3 of 1996) and have a valid practicing certificate issued by Physical **Planners Registration Board (PPRB)**

“Reference Number” means number issued depending on registration unit, registration section, block number as determined and serialized by the registrar.

“Inventory” a register for public land held by public agencies

“Monitoring” means the process of tracking, checking and supervising activities in progress to ensure they are on-course and on-schedule in meeting the set objectives and plan proposals.

“Oversight” means implementation authorities accountable for their actions and ensuring they implement policies strategies and plans in adherence to recommendations

“Geo-reference” means reference to an object by a specific location either on, above, or below the earth surface as per Land Act, 2012

“Geo referenced boundaries,” means reference to boundaries of a parcel of land to a specific or unique location on, above or below the earth surface as defined in the Survey Act CAP 290

“Disposition” means any sale, charge, transfer, grant, partition, exchange, lease, assignment, surrender, or disclaimer and includes the disclaimer or the creation of an easement, a usufructuary right, or other servitude or any other interest in a land or a lease and any other act by the owner of land or under a lease where the owner’s rights over that land or lease are affected or an agreement to undertake any of the dispositions.

“Land surrender” means land surrendered by an applicant at no cost to the government for open spaces, amenities, recreational facilities, road reserves, a public purpose relating to the area to be subdivided and road widening.

“Encumbrances” means any charge, lease, or other interest noted or required to be noted in the encumbrance section of the Land register

“Land donation” means land given for free by the individuals or private entities to the state for public purpose

“Commission” means the National Land Commission established by article 67 of the constitution

“Reservation” means public land reserved by order in the gazette by the commission. The reserved public land shall only be used for the purpose set out by the commission and shall not be subject to allocation or any other development.

“Allocation of land” means the legal process of granting rights to public land as per the Land Act, 2012.

“Land use” means the manner in which land is used, including the nature of the vegetation upon its surface

“Alienation of land” means the sale or other disposal of the rights to land as per the Land Act, 2012.

“Development” means carrying out any works on land or making any material change in use of any structures on the land.

“Base map” means a general-purpose map upon which specific purpose maps are based

“Development control” means the process of managing or regulating the carrying out of any works in land or making any material change in the use of any land or structures, and ensuring that operations on land conform to spatial development plans as well as policy guidelines, regulations and standards issued by the planning authority from time to time to achieve a purposeful utilization of land in the interest of the general welfare of the public

“Land Management” means the activities associated with management of land as both an environmental and economic resource.

“GIS” means a system for capturing, storing, checking, integrating, analyzing, and displaying data about the earth that is spatially referenced.

“Land use planning” means the process of designating, regulating, evaluating, zoning, and organizing the present and future use and development of land in all its geographical area and its resources to secure the physical, economic, and social efficiency, health, and wellbeing of urban and rural communities.

PART 1

DRAFT

1.0 INTRODUCTION

This part outlines the preamble, purpose, objectives, targeted users, and methodology of preparing the guide for preparation of land use and management plans (LUMP) for land held by public agencies in Kenya.

1.1 Preamble

This guide provides a basis for engagement between the public agencies and National Land Commission in preparing, approving and reviewing Land Use and Management Plans (Lump). This is in compliance to the constitution and the relevant statutes.

Article 67 2(a) and (h) requires the Commission to manage public land on behalf of the National and County governments and to monitor and have oversight responsibilities over land use planning throughout the country. In addition, Section 17(1) of the Land Act, 2012 states that a management body shall, on its own motion or at the request of the Commission, submit to the Commission for approval a plan for the development, management and use of the reserved public land vested in the management body. The First Schedule of Legal Notice 280 of 2017 of the Act requires the public agencies to prepare long term land use and management plans (LUMP) of their land and deposit the plans with the Commission.

Public agencies have used land allocated to them without preparing and submitting land use and management plans to the Commission for approval as required by the Land Act, 2012. This has resulted to uncoordinated use of land, underutilization (now being addressed through public lands Land Commercialization Initiatives), encroachment by squatters and land grabbing. This manifests into low economic returns, loss of public land and subsequently posing a threat to the future availability and use of public land in Kenya. The situation further contravenes the spirit of Article 60 (1) of the Constitution 2010, where land should be held, used and managed in a manner that is equitable, efficient, productive and sustainable.

It is against this backdrop that the Commission endeavors to prepare this guide for preparation of the land use and management plans as envisaged.

1.2 Purpose of the guide

The guide is a reference document to be used by public agencies and institutions to prepare land use and management plans for the land under their care and control. It will be used as a tool for sensitizing the public

agencies holding public land in adherence to provisions of section 17 of the Land Act, 2012. The guide basically provides for planning, approval processes and content to be included in the plan.

The Commission will also use the guide to approve the land use and management plans submitted by the agencies, and to monitor the preparation and implementation of the plans. The plans submitted will be stored in commission's depository established for;

- ✓ All land management documents.
- ✓ Ensuring accessibility of land records for institutional reference and public accountability.
- ✓ Digitization and secure storage of land-related documentation.
- ✓ Periodic auditing and verification of land records to maintain accuracy.

1.3 Objectives

The overall objective of the guide is to enable public agencies to prepare **land use and management plans** for optimal use of land under their care.

The specific objectives are to:

1. Provide processes for preparation of land use and management plans
2. Provide processes for approval and implementation of land use management plans
3. Facilitate monitoring and oversight of land use and management plans

1.4 Target users

The guide is intended for use by the following:

- i. Public agencies managing public land
- ii. Professionals
- iii. Development partners
- iv. Non-state actors
- v. General public

1.5 Methodology

This section provides an outline of the methods and approaches used to prepare the guide.

1.5.1 Approach

The preparation of the guide adopted the following approaches:

Multi-sectoral-various agencies were involved in the preparation of the guide. These include agencies from the agricultural, rural & urban development, energy, infrastructure & ICT, water, economic, education and governance sectors.

Participatory and Consultative - the guide was subjected to several consultative fora to ensure consensus towards a validated document that is appropriate and that the process meet public participation threshold. Both physical and online modes of public participation were employed.

1.5.2 Process

The preparation of the guide involved key phases that included the preliminaries, data collection and analysis, preparation of draft guide, public participation and a compilation of a final document. The final draft was subjected to the internal approval process of the Commission, adopted by the Commission, gazetted, published, launched and disseminated.

2.0 CONSTITUTIONAL, POLICY AND LEGAL CONTEXT

Key references in preparing this guide include the following: The Constitution of Kenya (2010), policy documents and legislations:

2.1 Constitutional Context

Article 67 (2) (a) of the Constitution of Kenya 2010 mandates the National Land Commission to manage public land on behalf of the National and the County Governments whereas article 67(2)(h) mandates the Commission to monitor and have oversight responsibilities over land use planning throughout the country.

Article 60 (1) states that land in Kenya shall be held, used, and managed in a manner that is equitable, efficient, productive, and sustainable. Further on, Article 66 on regulation of land use and property provides that the state may regulate the use of any land, or any interest in or right over any land, in the interest of defense, public safety, public order, public morality, public health, or land use planning.

Article 10 (2) (a) on National values and principles of governance emphasizes on public participation in decision making. In view of this, the guide adopts a participatory approach in preparation of land use management plans. These Articles provides a framework for clarity of roles between the public agencies and the oversight agency in the use and management of public land.

2.2 Policy Context

This section gives a brief detail of the policy papers that formed an essential reference in for the guide.

2.2.1 Sessional paper No. 3 of 2009 on the National Land Policy

The policy advocates for optimal use of land. It sets out goals and directions for the present and future management of land in Kenya. The guide thus takes into recognition the principles as envisaged in the sessional paper.

2.2.2 Sessional Paper No. 1 of 2017 on the National Land Use Policy

The sessional paper calls for proper management of land resources to promote public good and general welfare. The vision of the sessional paper is to guide Kenya towards an environmentally and socially responsible use of land and

land-based resources for socio-economic transformation of the people of Kenya. Section 3.2 (iv) of the policy states that all leases of public land will be issued with binding conditions clearly stating the intended use of the land and which shall comply with the relevant local land use plans and the national spatial plan. Furthermore, subsection (vii) provides that management of reserved public land should be predicated on approved development plans, local area development policies or technical guidance issued by the relevant planning authorities at national and county levels.

The guide seeks to operationalize sections 3.2(iv) and vii of the National Land Use Policy.

2.2.3 Kenya Vision 2030

This development blueprint aims to transform Kenya into a newly industrializing, middle-income country providing high quality of life to its citizens by the year 2030. The vision recognizes the central role of land in socio economic and political transformation of the country. The land held by public agencies in their nature are therefore key in realizing the vision.

2.3 Legal Context

In undertaking the preparation of the guide, the Commission adhered to the provision of the following statutes: Land Act of 2012, Physical and Land Use Planning Act of 2019, National Land Commission Act of 2012 and Environmental Management and Coordination Act of 1999(Revised, 2012) as well as other relevant sectoral laws.

2.3.1 Land Act, 2012

Section 10 (1) of the Land Act 2012 states that the Commission shall prescribe guidelines for the management of public land by all public agencies, statutory bodies and state corporations in actual occupation or use of public land. Further, Section 10 (2) states that the guidelines provided under sub section (1) shall indicate management priorities and operational principles for the management of public land resources for identified uses.

In addition, Section 17(1) and Land Regulations, Legal Notice 280 of 2017 requires that management bodies on their own motion or at the request of the Commission, submit to the Commission for approval a plan for the development, management and use of their reserved public land.

2.3.2 The National Land Commission Act, 2012

Section 5 (1) (a) mandates the Commission to manage public land on behalf of the National and County Governments while section 5 (h) mandates the commission to monitor and have oversight responsibilities over land use planning throughout the country. Further, section 6 (2) (c) gives powers to the Commission to take any measure it considers necessary to ensure compliance to the principles of land policy set out in Article 60 (1) of the Constitution.

2.4 Institutional roles

The table gives a summary of the roles of the institution involved in the preparation, approval and monitoring, oversight of the land use and management plans as follows:

Table 1: Institutional Roles

Institution	Role
National land commission	• Spearheading preparation of this guide • Sensitizing public agencies and institutions on preparation and implementation of land use and management plans. • Monitor and oversee preparation and implementation of the land use management plan. • Approve land use management plan submitted by the public agencies and institutions. • Undertake capacity building to the public agencies and institutions holding public land. • Issue advisories from time to time. • Issue revocation orders for non-compliance
Public Agencies	• Prepare land use management plans and submit them to the Commission for approval. • Use and develop land according to the approved land use management plans. • Implement the land use and management plans in accordance to sec 10 (2) of the Land Act,2012 • Care, control and manage reserved land.
Planning authority	• Make recommendation to the Commission • Checking compliance with development control of the area • Provide planning principles and standards
Development Partners	• To facilitate sensitization and awareness campaigns • Resource mobilization

	• Champions of accountability and transparency
Non-State Actors	• Popularize and create awareness • Share information with the Commission on any violation of the land use and management Plan • Champions of accountability and transparency (watch dogs)
Professional Associations	• Capacity Building • Adherence of planning standard and regulations

DRAFT

PART 2

DRAFT

3.0 LAND USE & MANAGEMENT PLAN

This section outlines the characteristics of the LUMP and guides on the format of the report and the layout.

3.1 Characteristics of LUMP

- This will be a long-term plan for a period of 20 years, reviewed every 10 years
- The typology of the plan will be varying (e.g. master plan, site/layout plan, zoning plan, etc.), depending on core-function, reserved land use and size of land held by different agencies.
- The plan shall be aligned to relevant legal framework and the existing approved development plans of the locality
- The plan shall be GIS based: The data captured should be in both spatial (shape files referenced in terms of x, y coordinates) and non-spatial data (attributes)
- The plan will be strategic, clear and precise
- The plan shall develop strategies that are geared towards land optimization

3.2 LUMP Planning Process

The preparation of the plan should involve the following activities:

- i. The agency notifies the commission on the intention to prepare the land use and management plan through a management Resolution - *a copy of which should form an annex of the final plan report*
- ii. Engage the services of a consortium with a registered planner taking the lead.
- iii. **Carry out data collection;**
 - Prepare a Base map
 - Collect site specific data in respect to: soil type, vegetation, Topography, Neighborhood Characteristics, environmental concerns (Identify and map ecological fragile zones on the land).
 - Describe the existing developments, Quantify the existing developments, Indicate any existing infrastructure and services on the land (storm drainage, liquid waste disposal...)
- iv. **Undertake the Situation analysis**

On this part, there should be a depiction of the current situation or conditions while examining the location attributes and relationship of features on the land. This may include:

- **Land suitability analysis** -is an assessment based on site characteristics of the land vis a vis the land use proposals of the agency)
 - **Land availability**- an assessment of the proposed land uses against the available land and the planning standards.
 - **Land capability**- is a rational assessment of the proposed land uses/ projections against the ability of the land to sustain the land use proposals without any long-term degradation
- v. Plan preparation:** The agency to prepare the LUMP
- vi. Plan Adoption:** The LUMP shall be submitted to the management for adoption
- vii. Submission for approval to the Commission**-the agency shall submit the LUMP in both hard and soft copies together with the minutes supporting the adoption
- viii. Plan Approval:** The Commission may approve or decline to approve a plan or recommend alteration or change of proposed zoning or use after review. Once the plan has been approved by the Commission, a copy will be sent to the agency for implementation purpose.

Below is a table indicating the actors and their roles in approval process of the LUMP:

Table 2: Actors and their roles

Actor	Role
Public agency	Adoption and submission to the commission for approval
Registered Planner by PPRB	Prepare and certify the plan
Commission	
Director in charge of Land Use Planning	Technical review and recommendation
Director in charge of Land Administration and Management	Technical review of the management priorities by the agency
Chairman	Approve the plan

4.0 FORMAT OF THE REPORT AND THE LAYOUT DESIGN

4.1: The planning report

The planning report will contain the following sub-sections:

1. Preliminary pages;

a) Cover page

The cover page of the report will include the following:

- Title of the plan
- Timeframe of the plan
- Pictorial representation of specific strategic highlights in the plan
- Logo of the institution

b) Approval page

The plan approval page shall have:

- Certificate signed by registered planner
- Adoption by the CEO of the agency
- Certification by Director Land Use Planning
- Certification by Director Land Administration and Management
- Approval by The National Land Commission

Format of the Approval Page see annex 2

c) Other sections of the preliminary page may include:

- Foreword
- Acknowledgement
- Executive summary
- Abbreviation
- Table of content
- List of figures
- List of maps
- List of tables

2. Overview of the Agency

In this section the public agency should describe itself whether it's a constitutional Commission, statutory body, government ministry, County Government as outlined below:

- Brief historical background about the agency
- State the establishment of the agency
- State how many parcels of land the agency owns in the country as per **annex 3**
- Describe the mandate of the agency and the constitutional and legal anchorage
- Describe the vision and mission of the agency

3. Purpose of the plan

In this section the agency shall state:

- reasons for preparing the plan
- the objectives of the plan
- the scope of the plan (location, coverage, time frame)
- Linkages to other plans
 - This shall indicate how the lump links to higher level plans (national, county and local development plans).

4. Planning Context

This section should describe site-specific information as indicated below:

a) Parcel specific description:

The expected attributes should include: Parcel Number/Land Reference number

b) Location: -

- Location of the land describe the site (county, Sub County and ward spatial representation)
- Provide coordinates based on accepted reference framework
- Provide Location map indicating key land marks
- spatial representation (layout) – GIS based maps
- Size- give size in hectares (Ha)

c) Status of the land:

- Ownership status can be evidenced by any of the listed documents (title, lease, letter of Allotment, reservation letter) of which a copy shall form part of the annex of the planning report.
- Land tenure-indicate whether freehold or leasehold
- Current land use/ reserved use
- Give the historical land use development
- Land disputes (if any)

- Encroachment on Land
- Legal Suit on Land
- Boundary disputes
- any encumbrance

5. Methodology

This should explain the approach used in the plan preparation. The methodology used will depend on the size of the land, the permitted use and the public participation processes.

6. Situational analysis

This section will include the data collected, analysis of information supporting the subsequent plan proposals

7. The plan

This section will include the proposals made in the plan and strategies for implementation.

8. Conclusion

9. Annexes

4.2 Format of the Layout design

The layout plan should be GIS based showing the various sub-land uses. These sub-land uses should be compatible with the main land use.

Specific details to be shown on the layout include:

- Title of the plan
- Land uses (existing and proposed)
- Location plan
- Legend should show the following information
 - Land use zones-indicating zones and acreage
 - Agency Name
 - Locality
 - Scale - series of 500
 - Date of preparation
 - North point
 - Section for certificate by registered planner
 - Section for Adoption by the management body
 - Section for certification by director land use planning NLC & director land administration NLC
 - Section for approval by the Commission
 - Minute number for Commission

Below is an illustration of the layout design

PART 3

DRAFT

5.0 IMPLEMENTATION OF THE LUMP

The plan will be implemented through a land management plan that will take into consideration the management priorities and operational principles.

5.1 Land Management Plan

A Land Management Plan (LMP) refers to strategies for the equitable, efficient, productive and sustainable utilization, development, and conservation of public land. It ensures that land resources are managed efficiently and in compliance with legal and regulatory requirements.

During implementation the public agency should adhere to an Implementation framework (LMP) that will detail the Management priorities and Operational principles. The Implementation Framework (land management plan) shall entail;

5.2 Management priorities

The agency should prepare a detailed land management implementation matrix indicating the management priorities, initiatives with defined timelines, resources, actors and responsibilities. It should also include measures in place to safeguard the boundaries, strategies on waste management, traffic management, water reticulation, land banking, Disaster and Safety management among others as detailed below:

5.2.1 Environmental and Social Considerations

The agency shall undertake EIA, ESIA depending on the magnitude of the proposed land use in the LUMP. It shall contain the following:

- Environmental and Social Impact Assessment and mitigation measures
- Sustainable land use practices for the site
- Community engagement and stakeholder consultation
- Compliance with environmental laws and policies

5.2.2 Legal and Regulatory Compliance

- Compliance with relevant land laws, policies, and regulations
- Adherence to planning and zoning requirements
- Any reservations, lease agreements, grants or titles held by the institution

5.2.3 Maintenance of Onsite Facilities and Improvements

- Define standards for routine and preventive maintenance of buildings, infrastructure, and utilities
- Establish regular inspection schedules and record-keeping of the site
- Ensure lessees are contractually responsible for maintaining leased property

5.2.4 Risk Management and Conflict Resolution

- Identification of potential risks (e.g., land disputes, environmental degradation, income from rent, user fees or royalties).
- Conflict resolution mechanisms and dispute management strategies.
- Measures for securing institutional land against encroachment, occupation and illegal use.

5.3 Operational principles (legal notice 280)

The agency should adhere to operational principles as outlined in LN 280 of land regulations 2017 i.e.

1. Seeking the commissions consent in compliance with development conditions as provided for various uses in the plan
2. Compliance with zoning regulations, development control of the resident county
3. The public agencies, statutory bodies and state corporations shall maintain the land for the purposes for which it was allocated and any other use provided in the LUMP.
4. The institutions shall undertake to prepare long term land-use and management plans for the land and deposit the plans with the Commission.
5. The institutions shall be responsible for provision and maintenance of relevant infrastructure in accordance with the county governments by-laws and other authorities.
6. Any change of use of the whole or part of the land, from the registered use shall require public consultation as required by law and approval from the National Land Commission, National or County Government in addition to any other relevant approval.
7. Where the institutions are found to be in breach of any conditions in the land management plans, they shall undertake appropriate action as shall be required by the Commission which include revocation or a fine.
8. Leasing/Subleasing Guidelines

Where an agency has leased or sub leased its land to another agency whose interest is of public interest then the following needs to be considered.

- Consent Requirement: *Obtain prior written consent from NLC for any lease or sublease.*

- Eligibility Criteria: *Define qualified lessees based on legal, social, economic and environmental interests.*
- Lease period and terms: *Outline permitted land uses, duration, rent and other payables including reviews, insurance and renewal conditions.*
- Subleasing: *Establish approval requirements and conditions for subleases.*
- Handover/Takeover Procedures: *Require detailed handover and takeover reports on commencement and expiry/termination of lease.*
- Maintenance Obligations: *Specify lessee responsibilities for repairs and maintenance of onsite facilities and improvements.*
- Due Diligence: *Conduct background checks on potential lessees.*
- Revenue Management: *Ensure proper accounting and investment of lease revenue.*
- Termination and Breach Provisions: *Establish consequences for non-compliance.*

9. Amendments of the plan

If there have been practical difficulties in the implementation of the plan; or there has been change of circumstances since the plan was approved, the agency may cause an amendment, modification, review or revision of the plan.

The changes to the plan shall be effected with consent from the commission. The updates should reflect stakeholders' views, changes in policy, land use needs, and emerging best practices.

6.0 MONITORING AND OVERSIGHT

The Commission shall conduct inspections to ensure that developments on public land are in accordance with the approved LUMP. Monitoring will be done through:

- a) Mandatory site visits that will be carried out at least once every 2 years
- b) The monitoring team will establish key performance indicators for land management.
- c) The commission shall undertake Regular assessment of compliance with LUMP objectives and provide inspection reports, where noncompliance is reported then orders and notices shall be issued by the National Land Commission and other relevant authorities.
- d) The commission shall document challenges on implementation of the LUMP and corrective actions where necessary.
- e) Satellite imagery: the agency shall submit periodic reports indicating the changes made on the land with support from satellite imagery
- f) Use of drones may also be used to support the monitoring process and ensuring of compliance of the LUMP

7.0 ANNEXES

7.1 FORMAT OF THE APPROVAL PAGE

CERTIFICATE

I certify that this plan has been prepared as per the Land Act 2012 (Sec 17 & 18), legal notice No 280 (first schedule), planning standards and guidelines.

7.2 LEGAL NOTICE 280 FIRST SCHEDULE (T.5)

Guidelines for Management of Public Land held by Public Agencies, Statutory Bodies and State Corporations

- 1. All public agencies, statutory bodies and state corporations shall maintain an inventory of all lands held by them and ensure that such lands are surveyed and titled.*
- 2. The public agencies, statutory bodies and state corporations shall maintain the land for the purposes for which it was allocated.*
- 3. The institutions shall undertake to prepare long term land-use and management plans for the land and deposit the plans with the Commission.*
- 4. The institutions shall be responsible for provision and maintenance of relevant infrastructure.*
- 5. The institutions shall ensure compliance to applicable statutory fees and charges including prompt payments of rates and rents.*
- 6. Where the land or part thereof forms part of an ecologically fragile ecosystem, due measures should be undertaken to conserve such land.*
- 7. Any change of use of the whole or part of the land, from the registered use shall require public consultation as required by law and approval from the National or County Government in addition to any other relevant approval.*
- 8. Where part of the land held by the institutions may be required in the interest of defense, public security, public morality, public safety, public order, or public health the Commission shall cause the Chief Land Registrar to make a temporary entry of the acquisition in the register.*
- 9. The institutions shall undertake periodic valuation of their land by the Chief Government Valuer.*
- 10. The institutions shall ensure that they comply with environmental management regulations as maybe prescribed by any other law.*
- 11. Where the institutions are found to be in breach of any conditions in the land management plans, they shall undertake appropriate action as shall be required by the Commission.*
